## A REVOLUTION IN personal mobility

Equipped with 24/7 access to our network of vehicles around Boulder and Denver, your employees can now choose to ride their bikes, take the bus, carpool and even Skip to work more. They will be happy to know that meetings, errands, and extended trips are only a swipe of the key fob away. Not having to pay for gas, insurance or maintenance fees might even inspire them to downsize from two cars to one (or even none) and save around \$6,500/year. On the business side, eGo can reduce the cost and liability of running your own fleet. Plus, if you are building a new property or applying for LEED certification, you can receive points for stationing a carsharing vehicle near or on-site.
